EXECUTIVE SUMMARY

There were 2,358 adults and children who were counted as homeless during the point-in-time count as noted in the chart below. This number represents a decrease of 83 persons or -3.4% when compared to the 2,441 persons who were counted as homeless in 2023.

The total number of persons counted as homeless has decreased from the prior year:

- The total number of persons counted as sheltered increased from 808 in 2023 to 927 in 2024, which represents an increase of 119 persons or 14.7%.
- The total number of persons counted as unsheltered decreased from 1,633 in 2023 to 1,431 in 2024, which represents a decrease of 202 persons or 12.4%.

Regarding sheltered homelessness, the U.S. Department of Housing and Urban Development (HUD) states that

- CoCs must count all individuals or families who meet the criteria in paragraph (1)(ii) of the homeless definition in 24 CFR 578.3. This includes individuals and families ***“living in a supervised publicly or privately operated shelter designated to provide temporary living arrangements (including congregate shelters, transitional housing, and hotels and motels paid for by charitable organizations or by federal, state, or local government programs for low-income individuals)”*** on the night designated for the count. This includes individuals residing in Safe Haven projects.

Regarding unsheltered homelessness, HUD states that:

- CoCs must count all individuals or families who meet the criteria in paragraph (1)(i) of the homeless definition in 24 CFR 578.3. This includes individuals and families ***“with a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings, including a car, park, abandoned building, bus or train station, airport, or camping ground”*** on the night designated for the count. Rapid Re-Housing (RRH) assisted households who are still unsheltered on the night of the count (e.g., staying in an encampment and being assisted by an RRH project to obtain housing) must be included as part of the unsheltered count.

EXECUTIVE SUMMARY

Ventura County first conducted a homeless count and subpopulation survey in 2007 as listed in Table 1. The following table compares the homeless counts since 2007. However, the homeless count and survey has been conducted every year beginning in 2009 except in 2021 (see note below).

TABLE 1. Ventura County Homeless Counts from 2007 – 2024.

YEAR	TOTAL # OF HOMELESS PERSONS	% OF INCREASE OR DECREASE FROM PREVIOUS YEAR
2007	1,961	-
2009	2,193	+12
2010	1,815	-17
2011	1,872	+3
2012	1,936	+3
2013	1,774	-8
2014	1,449	-18
2015	1,417	-2
2016	1,271	-10
2017	1,152	-9
2018	1,299	+12.8
2019	1,669	+28.5
2020	1,743	+4.4
2021	*	*
2022	2,238	+25.2
2023	2,441	+9.1
2024	2,358	-3.4

*The Ventura County CoC received an exception from HUD not to conduct an unsheltered count because of pandemic related reasons.

Chart 2 shows that the number of persons counted as homeless has increased significantly between 2019 and 2024. The number of persons counted as homeless in 2019 was 1,669 and 2,358 persons in 2024, which represents an increase of 689 persons or 41.3%.

EXECUTIVE SUMMARY

The next table provides the number of homeless persons counted since 2007 by cities and unincorporated area. A count was not conducted in 2008 and an exception was granted by HUD not to conduct an unsheltered count in 2021 due to the COVID-19 pandemic.

TABLE 2. Comparison of the total number of unsheltered and sheltered persons counted since 2007 by cities and unincorporated area

YEAR	CAMARILLO	FILLMORE	MOORPARK	OJAI	OXNARD
2007	10	5	13	82	671
2009	13	4	7	60	679

2022	30	115	141	210	713	109
2023	14	121	150	128	644	416***
2024	44	137	160	178	536	386***

**An unsheltered count was not conducted because of pandemic related reasons.

***Project Roomkey non-congregate shelters are counted in the Countywide data, as persons are served from various cities.

Table 3 provides a breakdown of the 2024 homeless count by sheltered and unsheltered persons for each jurisdiction. Among cities, Oxnard had the largest number of unsheltered persons (433) and the largest number of sheltered persons (319). The City of Ventura had the second largest number of unsheltered (316) and sheltered persons (220). Project Roomkey non-congregate shelters are counted in the Countywide data, as persons are served from various cities.

The decrease in the total number of people counted as homeless in the cities of Oxnard and Ventura from 2023 to 2024 was attributed to a lower observation rate for unsheltered surveys, as noted in charts 5 and 6 below, as well as the utilization of Emergency Housing Vouchers from HUD for more permanent housing placements this past year. The observation rate in 2023 was 57.8% and this resulted in a significant number of observation surveys which could not be deduplicated. The observation rate in 2024 dropped to 34% which allowed for a greater number of full surveys to be reviewed for deduplication purposes.

EXECUTIVE SUMMARY

TABLE 3. Total Number of Sheltered and Unsheltered Adults and Children by Jurisdiction in 2024

*Sheltered persons include emergency shelters, transitional housing, and safe havens (Note: only Ventura has a safe haven).

**percentages are only provided for differences that were 200% or less.

***Includes Survivors of Domestic Violence (DV) programs.

UNSHELTERED PERSONS

Of the 2,358 persons counted in 2024, 1,431 or 60.7% were unsheltered, which is defined by the U.S. Department of Housing and Urban Development (HUD) as

“An individual or family who lacks a fixed, regular, and adequate nighttime residence, meaning: (i) An individual or family with a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings.”

Of the 1,431 unsheltered persons, 1,412 were adults and 19 were accompanied children under age 18.

Of the 11 jurisdictions, four include families with children under age 18. The cities of

- **Simi Valley** includes one family with three children;
- **Oxnard** includes three families with seven children consisting of one family with two children, one family with four children, and one family with one child;
- **Ventura** includes two families with two children consisting of two families with one child;
- **Thousand Oaks** includes two families with 4 children consisting of one family with three children and one family with one child.
- **Unincorporated/County** includes two families with 3 children consisting of one family with two children, and one family with one child

Of the ten families, five families were two adult households. Four families had two adults and one child and one family had two adults and three children. Three families were three adult households. Two families had three adults and two children and one family had three adults and four children. One family had five adults and one child. The last family had one adult and three children.

Surveyed vs Observation

The goal was to survey, meaning to interview, as many adults who were counted about themselves and any children who were living unsheltered with them. Survey questions focused on requirements from HUD and local information desired by the Ventura County Continuum of Care (CoC). The number and percentage of adults surveyed is noted in Table 5.

HUD requires CoCs to report the number of various subpopulations that include chronically homeless individuals and families, persons with serious mental illness, substance use disorders, AIDS or an HIV-related illness, and veterans. The CoC desired local information included a focus on chronic health condition, first time homelessness, foster youth, income, and involvement with the justice system.

Counters surveyed 933 adults that answered questions about themselves and the 17 children living unsheltered with them. Thus, survey information was collected for 950 persons. The survey included questions about gender, age, race, ethnicity, and length of time homeless for adults and children. Other

UNSHELTERED PERSONS

questions about disability, health, mental health, substance use, income, and veteran status pertained only to adults.

Persons were observed and not surveyed if volunteer counters felt unsafe or an unsheltered person was sleeping. Volunteers were asked to count the person by recording an estimate of the individual's gender, age, race, and ethnicity. Of the 481 persons observed, 479 were adults and 2 were children.

The observation rate decreased from 57.8% in 2023 to 34% in 2024 with an increased number of volunteer counters countywide. Additional training was offered in January 2024 to review the mobile app and emphasize the importance of full surveys when possible. Full surveys assist with a more accurate count and provide more details with subpopulation data.

TABLE 5. Total Number and Percent of Unsheltered Adults Surveyed and Observed

YEAR	SURVEYED		OBSERVED		TOTAL	
	#	%	#	%	#	%
2019	907	72.1	351	27.9	1,258	100

UNSHELTERED PERSONS

The following four tables focus on gender, ethnicity, race, and age for the 1,431 unsheltered adults and children who were surveyed and observed.

Gender

The following table provides a breakdown by gender for the 1,412 adults and 19 children under age 18 in families. HUD requires the summary to consist of male, female, transgender, non-binary, questioning, different identity, more than one gender, culturally specific identity, and unknown.

TABLE 7. Gender for Adults and Children

GENDER	ADULTS		CHILDREN IN FAMILIES	
	#	%	#	%
Male (Boy if child)	987	69.9	10	52.6
Female (Girl if child)	407	28.8	9	47.4
Transgender	7	0.5	0	0
Non-Binary	1	0.1	0	0
Questioning	1	0.1	0	0
Different Identity	0	0	0	0
More Than One Gender	9	0.6	0	0
Culturally Specific Identity (e.g., Two-Spirit)	0	0	0	0
Total	1,412	100	19	100

Of the 9 persons that identified as more than one gender, 9 persons identified as both male and female. One person selected female and questioning, one selected female and transgender, and the last person selected male and non-binary.

UNSHELTERED PERSONS

Race and Ethnicity

Table 8 provides a breakdown by race and ethnicity for the 1,412 adults and 19 children under age 18 in families. HUD requires the summary to consist of Hispanic/Latin(a)(o)(x) and Non-Hispanic/Latin(a)(o)(x).

TABLE 8. Ethnicity for Adults and Children

ETHNICITY	ADULTS		CHILDREN IN FAMILIES

*In 2023, seven families consisted of 22 persons of which 9 were adults and 13 were children, none of whom were chronically homeless.

**In 2024, 10 families consisted of 44 persons of which 25 were adults and 19 were children. Of the 10 families, 5 were chronically homeless and include 14 adults and 10 children.

Other Survey Questions

Did you become homeless for the first time in the last 12 months?

Chart 3 shows that the percentage of unsheltered adults who became homeless for the first time during the past 12 months is decreasing. Nearly one-fourth (24%) of unsheltered adults in 2020, nearly one-third (32%) in 2022, more than one-third (39%) in 2023 and less than one-fourth in 2024 (17%).

CHART 3

Became Homeless for the First Time During the Past 12 Months

UNSHELTERED PERSONS

Additional resources for homelessness prevention have been dedicated through the State of California and Ventura County Continuum of Care. The rental assistance, utility assistance and landlord engagement have provided more stability for many households who were at risk of homelessness during program year 2023.

BACKGROUND INFORMATION

The U.S. Department of Housing and Urban Development (HUD), as part of its requirements for local jurisdictions to continue to receive Continuum of Care (CoC) funding for homeless persons, has asked local jurisdictional applicants to conduct a “one-day point-in-time” unsheltered and sheltered homeless count every other year since 2005 during the last 10 days of January. However, since 2012, HUD requires a sheltered count every year, which includes emergency shelters and transitional housing programs, including safe havens. The Ventura County CoC, however, has conducted an annual unsheltered and sheltered count since 2009 with the exception of 2021 which only included those sheltered due to the COVID-19 pandemic.

In addition, HUD requires local jurisdictional applicants to gather data for the following subpopulations: chronically homeless individuals, chronically homeless families, persons with mental illness, persons with HIV/AIDS, substance users, veterans, victims of domestic violence, unaccompanied youth under age 18, and youth ages 18 – 24.

A. When were the 2024 Count and Subpopulation Surveys conducted?

The homeless count and subpopulation surveys were conducted on January 24, 2024 to survey persons who slept sheltered or unsheltered on the night of January 23, 2024. Additionally, HUD allows for communities to survey persons at service site locations and other areas such as homeless encampments within seven days following the night of the count. In Ventura County, each community lead identified service sites and other areas to survey. Service providers, volunteers and law enforcement partners assisted with surveying these locations on days following the count, including encampments. The person had to report sleeping in a “place not meant for human habitation” on the night of January 23, 2024 to be included in the count. Identifier information was collected to prevent duplication.

The local Homeless Management Information System (HMIS) was used to complete the sheltered count on the same day. Those agencies that operate an emergency shelter or transitional housing program and do not participate in HMIS completed a survey with the same information as collected in HMIS.

B. Who was counted and surveyed in 2024?

Only those persons who met HUD’s definition of homelessness were counted and surveyed. HUD considers a person homeless only when he/she lives:

- In places not meant for human habitation, such as cars, parks, sidewalks, and abandoned buildings;
- In an emergency shelter;
- In transitional housing; and
- In a safe haven.

HUD does not consider the following persons to be homeless—persons who are “doubled up,” or persons who are “near homelessness”—but considers them to be at-risk of becoming homeless. Such persons were not included in the homeless count. The 2022 Census Bureau data noted that 9.5% or approximately 79,123 of the county’s 832,871 residents or approximately 26,000 households in the County were living below the poverty level. These persons are at risk of becoming homeless. Many of these persons can become homeless because of social structural issues such as increases in rent, loss

BACKGROUND INFORMATION

of job, and rising health care costs. In addition, personal experiences such as domestic violence, physical disabilities, mental illness, and substance abuse can cause members of a low-income household or an entire household to become homeless. Often, one or more of these experiences factor into a household's homeless experience as suggested in Table 11.

The Ventura County Continuum of Care homeless services system saw 6,060 persons including 5,271 adults and 1,215 persons in families, including 759 children. 31% of those served by homeless service providers in 2023 were seniors (55 and older). A total of 3,284 referrals were made to programs including homeless prevention assistance, emergency shelter, transitional housing, and rapid re-housing. In all programs that work to connect persons with permanent housing (emergency shelter, transitional housing, and rapid re-housing) 57% of persons served were assisted with permanent housing. While the system continues to experience challenges in identifying affordable and available housing units for all persons that need them, persons in permanent housing programs (rapid re-housing and permanent housing) saw a greater than 95% success rate in retaining permanent housing. The 40 participating partner agencies and their various programs are successful in housing individuals and families and supporting those households in achieving housing stability when the right resources are available.

During 2023, Ventura County 211 continued to see calls for housing assistance which resulted in the top unmet need category. The charts below show calls from persons who were at-risk of homelessness or currently unhoused in each jurisdiction throughout the County.

BACKGROUND INFORMATION

The County of Ventura Healthcare for the Homeless reported 2,521 persons enrolled that met the Health Resources & Services Administration (HRSA) definition of homeless (includes doubled-up and at-risk persons). Of this number, approximately 90% (2,269) were literally homeless (on the streets, emergency shelter or transitional housing).

The Ventura County Office of Education also tracks the number of homeless students through a broader definition of homelessness set by the Federal Department of Education. Currently, 7,455 students are classified under the McKinney Vento Act and data collected in the 2023 school year showed that 6,952 students were temporarily doubled up or at-risk of homelessness. Of those, approximately 500 students met the HUD definition of homelessness. This data includes all public K-12 schools in Ventura County.

C. Who carried out the count and subpopulation survey?

Approximately 450 volunteers helped with the unsheltered count and subpopulation survey. Each city had volunteer teams that were coordinated by a team leader(s). In addition, volunteer teams were coordinated by a team leader(s) to count in unincorporated areas of the county. Teams counted on the streets, in encampments, at non-residential program sites that served homeless persons such as food programs, health care centers, one stop services, and public assistance sites.

Volunteer efforts were coordinated by the County Executive Office (CEO), which is responsible to the Board of Supervisors for the general administration and coordination of all County operations and programs (see www.ventura.org/county-executive-office). The CEO's office also provides staff support to the Countywide Continuum of Care. The CEO consulted with the Institute for Urban Initiatives to complete the count and subpopulation survey.

Urban Initiatives is a community-based research and development agency that has completed many housing and homeless assessments including several homeless counts for cities and counties throughout Southern California. It consists of several agencies that respond to the economic, housing, and social needs of neighborhoods, cities, and counties from community, regional, national, international, and faith-based perspectives (see www.urban-initiatives.org).

The CEO also consulted with the Ventura County Continuum of Care Alliance (VCCCA), whose mission is to facilitate an end to homelessness in Ventura County by coordinating funding, housing, and service strategies that prevent and end homelessness to plan and coordinate the count. The VCCCA is made up of individuals and representatives who support the mission, including those from the service sector (mental health agencies, health care agencies, social service providers, victim advocates, and educational institutions), housing agencies (non-profit and for-profit developers, housing authorities), law enforcement, and advocates (faith community, formerly homeless and neighborhood groups). For more information about VCCCA, visit www.venturacoc.org.

UNSHELTERED COUNTY AND SURVEY METHODOLOGY

Unsheltered Count and Survey

A homeless count and subpopulation survey instrument was used to gather unsheltered data by volunteer counters. The survey data was gathered primarily by utilizing the Simtech Solutions Counting Us mobile app.

A digital survey form was designed to simplify the surveyor’s experience; only relevant questions were displayed based on the answers already entered, eliminating the need for surveyors to devote time and effort to determine which questions to ask, and resulting in a simpler linear surveying experience.

Volunteers entered responses to survey questions on their mobile devices where survey data was instantly submitted to a regional command center. The survey questions were focused on gathering demographic information and subpopulation as required by HUD. The instrument focused on gathering responses that were used to create an identifier and to determine the number of persons for each subpopulation required by HUD. All information gathered through this instrument remains confidential.

During the count, volunteers collected the following information concerning every homeless person counted: first initial of first name, first initial of last name, gender, race, age by code, and physical disability. The information for each encounter was exported into a data base. The information was used to create an identifier for each person. For example, a homeless person may have the following code of “WTM56Y.” This means that this person’s first name began with “W”, last name began with “T”, he was male “M”, he was White “5”, in the age range of 45-54 “6”, and said “yes” when asked if they had a physical disability.

FIRST INITIAL	LAST INITIAL	GENDER	RACE	AGE	PHYSICAL DISABILITY
W	T	M	5	6	Yes

If the same identifier appeared more than once, it was assumed that this was the same person and the person would only be counted once. An example to illustrate how this process worked is noted in the table below. Numbers 6 and 7 (shaded in gray) would be considered the same person. If for some reason there was doubt that numbers 6 and 7 were the same person, other data collected on the same two people would be used to address the doubt.

NUMBER OF PERSONS	FIRST INITIAL	LAST INITIAL	GENDER	RACE	AGE	PHYSICAL DISABILITY
1	J	H	F	5	6	No
2	H	T	M	4	7	No
3	R	K	F	4	5	No
4	K	N	M	1	4	Yes
5	F	A	M	3	3	No
6	J	F	M	5	5	Yes
7	J	F	M	5	5	Yes

UNSHELTERED COUNTY AND SURVEY METHODOLOGY

The obtained data also provided the opportunity to break down the number of homeless persons counted by gender, ethnicity, age range, and state born. Thus, the questions served two purposes—basic demographic information and the prevention of duplication.

¹ The code for race was 1=African American or Black; 2=American Indian or Alaskan Native; 3=Asian; 4=Native Hawaiian or Pacific Islander; 5=White; 6=Multiple Races or Other, 7=Don't Know; and 8=Refused to Answer.

² The code for age included: 0=under 5; 1=5-12; 2=13-17; 3=18-24; 4=25-34; 5=35-44; 6=45-54; 7=55-61; and 8=62+.

The survey instrument also focused on gathering responses to several questions to determine the number of persons for each of the eight subpopulations required by HUD, which include:

- Chronically Homeless Individuals;
- Chronically Homeless Families;
- Persons with HIV/AIDS;
- Persons with Chronic Substance Abuse;
- Persons with Severe Mental Illness;
- Unaccompanied Youth under Age 18;
- Veterans;
- Persons fleeing Domestic Violence; and
- Youth Ages 18 to 24.

Other subpopulation data was also collected for:

- Persons released from jail during past 12 months after serving a court-ordered sentence;
- Persons with a Physical Disability;
- Persons with a Developmental Disability;
- Persons with Chronic Health Conditions; and
- Seniors age 62+.

A HUD approved extrapolation methodology was used to estimate population demographics for the observation surveys. This methodology applies the surveyed proportion of demographic data to the total population experiencing homelessness for an extrapolated estimate.

Sheltered Count and Survey

As required by HUD, the sheltered count included the number of persons and households sleeping in emergency shelters (including seasonal shelters) and transitional housing, which were listed on the Housing Inventory Chart (HIC) (see Appendix D). In addition, any persons staying in hotels or motels as a result of receiving a voucher from a social service agency were included in the sheltered count per HUD's instructions if the voucher program was listed on the HIC.

The HIC is updated and submitted to HUD in May of each year, as part of the annual Point-in-Time count process. Prior to the homeless count, the HIC was updated by CEO staff to include any new programs or exclude any programs no longer operational.

HUD encourages the use of HMIS data to generate sheltered counts and subpopulation data for programs with 100% of beds participating in HMIS. Thus, HMIS was used to gather the total number of occupied beds and the number of persons for each subpopulation. Data was also collected on the total number of occupied beds and the number of persons for each subpopulation for non-participating HMIS programs. The same questions used to collect subpopulation data through HMIS were used for the data collection instrument.

UNSHELTERED SUBPOPULATION SUMMARIES

This section provides a breakdown of each of the following unsheltered subpopulations:

- Chronically homeless adults
- Women
- Veterans
- Youth ages 18 – 24

Several questions were asked to determine if the adult met HUD's definition of chronic homelessness which is an individual with a disability as defined in section 401(9) of the McKinney-Vento Assistance Act (42 U.S.C. 11360(9)) and who lives in a place not meant for human habitation, a safe haven, or in an emergency shelter, and has been homeless and living as described for at least 12 months or on at least 4 separate occasions in the last 3 years, as long as the combined occasions equal at least 12 months.

NEXT STEPS: IMPLEMENTING RECOMMENDATIONS TO END HOMELESSNESS

The Ventura County Continuum of Care (VC CoC) Board approved the following recommendations in April 2024 to prevent and end homelessness in Ventura County. These recommendations are aligned with the Ventura County Plan to Prevent and End Homelessness which was adopted by the Ventura County Board of Supervisors in December 2023. The full plan can be found on the VC CoC website here:

The following recommendations were approved by the VC CoC Board for 2024:

- 1 Achieve functional zero with homeless veterans in 2024 in collaboration with Veteran Affairs and local veteran service providers;
- 2 Further the efforts to end homelessness among unsheltered youth with the expansion of new transitional housing programs for transitional-age-youth (18-24);
- 3 Reduce the number of chronically homeless adults by 2024 with the addition of new permanent supportive housing units;
- 4 Encourage each jurisdiction to review their 2024 unsheltered homeless count and align local strategies to reduce unsheltered homelessness;
- 5 Expand the efforts of the Ventura County Continuum of Care Workgroup partnering with people with lived experience to solicit feedback and provide recommendations;
- 6 Reduce the number of first time homeless households by expanding homelessness prevention programs and implementing diversion strategies;
- 7 Leverage resources to prioritize or increase supportive services for housing retention.

Total	340	62	1	0

There has been an increase in the number of single adults in Emergency Shelter and Transitional Housing, from 583 in 2023 to 584 in 2024, as non-congregate shelters have been operating through Project Roomkey motels and Non congregate motel vouchers funded by State Homeless Housing Assistance and Prevention Funding. Project Roomkey has been supported through FEMA funding for those who were unsheltered and highly vulnerable to COVID-19, including seniors 65 & older and those with serious health conditions.

ACKNOWLEDGEMENTS

The County of Ventura and Ventura County Continuum of Care would like to thank the 450 volunteers and organizations that contributed to the success of the 2024 Homeless Count. The collaboration and efforts of our community volunteers, community groups, faith- and community-based organizations, county departments, city representatives and staff, homeless service providers, law enforcement and elected officials is greatly appreciated, as this comprehensive data is critical to effectively plan and provide resources to the most vulnerable populations in our community.
